```
               KD4Z - md380tools-vm (v3.06)      (UsersCSV records 52013)

Before running flash or flashgps, the radio must be in DFU mode.
Power on holding PTT and top button.  Verify in the 'Devices/USB' menu,
verify that 'AnyRoad Technology Digital Radio' is selected.

Before running flashdb the radio should be in normal power ON mode.
In the 'Devices\USB' menu, the radio will be called '@0000:ffff Patched MD380'

 glv        -- (Get Latest Version) Downloads and builds everything

After glv, all commands below can be run without an Internet connection.

 flash    -- (DFU) Write firmware to radios without GPS (MD-380 / RT3)
 flashgps -- (DFU) Write firmware to radios having GPS (MD-390 / RT8)
 flashdb  -- (ON)  Write 'UsersCSV' contact list to radio

 ~/lookup searchstring -- Query the UserCSV data for searchstring

                    menu      -- Display this screen again (or Ctrl-D)
                    help      -- Display typical command recipes

tyt@DmR:~$ _
```

Right Ctrl
